SKILLS

- **JavaScript**
- **HTML, CSS, JSX, TSX**
- **ReactJs, NextJs, React Native**
- **Typescript**
- **Tailwind, MUI ,ShadCN, React Bootstrap**

- **NodeJs, ExpressJs, Mongo DB**
- **Git, GitHub, Gitlab**
- **Jira, Trello**
- **Render, Vercel, Netlify**
- **Postman**

EDUCATION

- **BS Software Engineering | IMSciences, Peshawar**   *CGPA: 3.2* | *2020-24*

- **FSc(Pre-Engr) | GHSS Maneri Payan**   Percentage: *70.8% | 2017- 19*

EXPERIENCE

- **JavaScript Developer | Techcreator**

  (July 2024 - present)

  As a JavaScript Developer at TechCreator, I am responsible for designing user interfaces, integrating APIs, and creating full-stack applications. My role involves ensuring high-performance, quality, and responsiveness of mobile applications for both iOS and Android platforms. I collaborate with cross-functional teams to deliver innovative features and solutions.

- **JavaScript Intern | Techcreator**

  (March 2024 – June 2024)

  During my internship at TechCreator as a JavaScript Intern, I gained valuable experience in designing user interfaces and integrating APIs. I worked on several projects, including my Final Year Project, EventSage - Event management system. This role allowed me to develop practical skills in creating responsive and visually appealing mobile applications while seamlessly connecting to external data sources.

- **IT Lead | IM|Olympiad'24**

  (Jan 2024 - Feb 2024)

  Designed and developed a responsive website for the biggest sports event of KP, showcasing Events, team, and registration forms. Users were able to register through the web app - Technologies

- **MERN Stack Fellow | Bytewise Limited**

  (Sept 2022 - Dec 2022)

  Completed 3 months internship with hands-on experience in MERN Stack - Reactjs, Expressjs, Nodejs, Mongo DB (MERN)

PROJECTS

- **TaxiRapport   (Swedish Company)**

  We developed a mobile app using React Native that simplifies the process of report sharing between drivers and vehicle owners. The goal was to eliminate the need for manual registration and streamline communication, ensuring that both parties could easily access important reports in real time. On the backend, we used a robust Mongo DB database to securely store data, while the app itself was built with Express and Node.js to ensure fast and reliable performance. This digital solution saves time and enhances transparency and efficiency in managing driver-owner partnerships.

- **Event Management System (EventSage)**

  Our platform connects clients who need event planning services with vendors who offer them. Clients can explore different event packages, customize their choices, and book services directly through our system. Vendors can sign up, showcase their services, set prices, and easily manage bookings. Plus, clients can leave reviews to help vendors improve. The system includes a handy booking and scheduling tool with a calendar feature to keep track of dates and send reminders, so no one misses anything important.

- **IMOlympiad'23 website and IMOlympiad'24 website**

  Designed and developed a responsive website for the biggest sports event of KP, showcasing Events, team, and registration forms. Users were able to register through the web app - Technologies

- **Various Semester and Personal Projects.**

ACHIEVEMENTS / HOBBIES

- **Runner-up:**

  All KPK Universities badminton championship 2022 (IMSciences).
