SUMMARY

Software Engineer with over 2 years of experience specializing in React Native and the MERN stack. Proven track record in developing high-performance, cross-platform mobile applications, with a specialized focus on 3D graphics integration (Three.js) and scalable backend architectures. Expert in TypeScript and modern state management, dedicated to delivering clean, maintainable code and intuitive user experiences for complex technical solutions.

EDUCATION

Bachelor of Software Engineering,

Institute Of Management Sciences (IMSciences), Peshawar 2020 – 2024

FSc Pre-Engineering (Equivalent to UK A-Levels)

Government Higher Secondary School (GHSS), Maneri Payan 2017 – 2019

EXPERIENCE

Software Engineer (React Native/React Developer)

Eastern Tech | August 2025 – Present

- Engineering and maintaining robust cross-platform mobile and tablet applications using React Native and TypeScript, ensuring type safety, code quality, and exceptional responsiveness.
- Research and development (R&D) initiatives for printing solutions, successfully integrating thermal receipt printers with the mobile app and overcoming challenges with Bluetooth, USB, and network connectivity.
- Developing and optimizing the user interface and navigation flow with React Navigation, ensuring a seamless and intuitive user experience across the app.
- Contributing to both front-end and back-end development for web applications using React, Next.js, Node.js, and Express.js, and managing state efficiently with Redux Toolkit.
- Designing and executing comprehensive testing strategies, including performance testing with JMeter and end-to-end testing with Cypress, to ensure application scalability and reliability.

Software Engineer (React Native/React Developer)

TechCreator | February 2024 – August 2025

- Developed and maintained cross-platform mobile apps (iOS/Android) using React Native, ensuring high performance and responsiveness.
- Developed cross-platform apps using React Native, leveraging React Navigation v6 for seamless routing and Redux Toolkit for state management.
- Configured CI/CD pipelines via GitHub Actions for automated Android/iOS deployments.
- Designed intuitive UI/UX with Tailwind CSS, MUI, and ShadCN for seamless user experiences.
- Integrated RESTful APIs and managed state efficiently using modern React patterns.
- Collaborated with backend teams to optimize Node.js/Express.js endpoints for mobile efficiency.
- Followed Agile methodologies (Jira/Trello) to deliver features in iterative sprints.
- App Store and Play Store Deployment.

IT Lead

IM|Olympiad'24 | January 2024 – February 2024

- Led development of a responsive registration portal for KP's largest sports event (10k+ users).
- Architected frontend with Next.js and Tailwind CSS, enabling seamless mobile/desktop access.
- Automated team registrations, cutting admin workload by 60%.

PROJECTS

1. 3D Product Configurator (Web App)

- Three.js • React Three Fiber • (<https://royalslugger.netlify.app/>)
- Developed an interactive 3D/2D product customization tool. Implemented dynamic rendering of GLB/GLTF models using Three.js to allow real-time 3D rotation and material updates. Optimized 3D asset loading times by 30% using texture compression and GLTF optimization.

2. TaxiRapport (Android and IOS App)

- React Native • Node.js • Express.js • MongoDB
- Developed a cross-platform mobile app to streamline real-time report sharing between vehicle owners and drivers. Integrated secure backend with MongoDB and Express.js, eliminating manual communication and enhancing transparency in vehicle management.

3. Contentia UGC İçerik Platformu (Android and IOS App)

- React Native • Redux Toolkit • React Hook Form
- Built a cross-platform mobile application where businesses can post content jobs (e.g., videos, blogs) and creators can apply or bid. Implemented a multi-step creator application form with React Hook Form and centralized job state management using Redux Toolkit. Deployed the app to TestFlight and App Store, with real-time notifications powered by Firebase.

4. Mythasci – Streaming App (Android and IOS App)

- React Native • React-native-video • Streaming
- Engineered a high-performance video streaming application similar to Netflix. Leveraged FastImage for optimized poster caching and integrated a robust video player with custom controls. Implemented background playback and orientation locking to enhance user immersion across mobile and tablet devices.

5. IM|Olympiad'23 & IM|Olympiad'24 Websites

- React.js • Tailwind CSS • Responsive Design
- Designed and developed responsive web portals for KP's largest university sports event. Enabled users to register and view events via an intuitive and mobile-optimized interface.

6. Additional Projects

- Developed multiple semester and personal projects using the MERN stack and modern UI libraries for web and mobile apps.

SKILLS

Soft Skills:

- Problem-Solving • Team Collaboration • Adaptability • Time Management • Attention to Detail • Communication • Agile/Scrum Mindset • Leadership

Technical Skills:

- Languages: TypeScript, JavaScript (ES6+), HTML5, CSS3/Sass.
- Mobile: React Native, Expo, React Navigation, FastImage, Native Modules.
- Frontend: React.js, Next.js, Three.js, React Three Fiber, Tailwind CSS, ShadCN.
- Backend: Node.js, Express.js, MongoDB, RESTful APIs, Firebase.
- Tools: Git, GitHub Actions (CI/CD), Docker, JMeter, Cypress, Jira/Agile.

Languages:

- English (Professional Proficiency)
- Urdu (Native)
- Pashto (Native)

CERTIFICATIONS AND WORKSHOPS

I. Bytewise MERN Stack Fellowship – Bytewise Limited

Issued: December 2022

Credential ID: 033a2356-9d2a-4ac5-847b-1100263e11cc

Skills: Debugging, MERN Stack, React.js, Redux, REST APIs, Express.js, Node.js, React Native, Mobile Apps, Web Development
